

I visited this campus today. In terms of observing the status of campus quality improvement program, I came here. In this context, I discussed with the Campus Chief and teachers.

- (i) The campus is located in the appropriate place where there are about 400 students have been enrolled.
- (ii) The campus is going to improve its infrastructures and teaching learning simultaneously. I hope, it will reach in its destination.
- (iii) I found that that campus has been practicing cooperative efforts which is positive sign for quality education.
- (iv) The environment is peaceful which is supportive for education.

Finally, I would like to appreciate to the administration, specially for the Campus Chief for his cooperation and support.

Thank you!

W.D. Chandrasekhar

We have visited this campus today for Career Workshop to help students Polish & flourish further in future with suitable & desired Career Pathways. We found the campus to have very friendly & comfortable environment, students are also quite active though shy somehow but all in all we found ^{the} campus to be very much growing as well for the facilities & education services that it is providing to the students. We also would note that Mr. Netra Sir to be very much thoughtful regarding the education & scopes for student which can be offered by the campus.

"Thank You"
